[Remsen-23](#) and Remsen-4 appear to represent the same person because: This is the oldest maternal ancestor in this chain in need of a merge into the NNS PPP. No tree conflicts. Thanks!

[VanDerBeek-53](#) and Remsen-4 appear to represent the same person because: This is the oldest maternal ancestor in this chain in need of a merge. No tree conflicts. These matches have been reviewed by the [New Netherland Settlers Merge Approval System](#), and the "Green" destination NNS profile is protected as PPP, and the "Merge Pending" profile is now ready and able to be merged into it. I saved the data to the bios. Thanks!

[Liz \(Noland\) Shifflett](#)

[Remsen-5](#) and Remsen-4 appear to represent the same person because: they have the same birth/death dates & same parents. Remsen-4 (through G2G discussion) is the final WikiTree ID. However, her father's name needs more research to determine what variation of Vanderbeek is most likely.
